

José María Coronel

Pilar, Buenos Aires, Argentina · [LinkedIn](#) · [Portfolio](#) · [GitHub](#) · josecoronel20@outlook.com

Fullstack Developer with a frontend focus (React, Next.js, Node.js, TypeScript). Experienced in building modern applications using best practices, secure authentication, and relational databases. Currently seeking my first IT role to contribute value and grow in backend development and software architecture.

TECH STACK

- **Frontend:** React, Next.js, TypeScript, Shadcn
 - **Backend:** Node.js, Express, JWT, HTTP-only Cookies
 - **ORM & Database:** Prisma, PostgreSQL, Supabase
 - **Tools:** Git, GitHub, Cursor, OpenAI API
 - **Testing:** React Testing Library, Jest
-

FEATURED PROJECTS

Workout Generator

- Custom workout routine generator using OpenAI API.
- Fullstack application with secure authentication.
- First project integrating AI to generate dynamic content.

Chapel Fútbol

- Landing page for a football training center.
- Hidden admin panel with player CRUD and multimedia storage.
- Modular architecture implementation for scalability and maintainability.

Ecommerce

- First fullstack project with authentication and security.
 - Built with TypeScript, Next.js, Express, PostgreSQL, Prisma, Supabase, and JWT.
 - Focused on scalable architecture and development best practices.
